

SAN GABRIEL VALLEY MOSQUITO & VECTOR CONTROL DISTRICT

Protecting Public Health Since 1989

Who We Are

The San Gabriel Valley Mosquito and Vector District was formed as an independent special district in 1989 to protect residents from vector-borne diseases like West Nile virus and dengue.

The district provides services to 26 cities, including your community, and portions of unincorporated Los Angeles County.

What We Do

Under the California Health and Safety Code, the District protects public health from vector-borne disease in both private and public areas. Public health vector control compliments private pest control services by monitoring and controlling mosquitoes and other vectors in areas private pest control operators can't treat. These include areas near your business: spreading grounds, flood channels, underground storm drains, and more. When vector-borne disease is detected in an area, our agency responds to protect public health.

How our District Supports Businesses

Health Concerns

- Bites can create distractions and affect customer and staff experience.
- Scratching bites can lead to bacterial infections.
- Vector-borne diseases can be dangerous for those with compromised immune systems.
- Some vector-borne diseases are passed from person to person via the vector and location "clusters" can occur.

How our District Helps

- Our staff works year-round to control mosquitoes on public and private properties.
- Our staff monitors and responds to mosquito-borne disease in the San Gabriel Valley
- We partner with businesses to control mosquitoes indoors and outdoors.
- Our outreach program can teach staff how to prevent bites, identify mosquitoes, and eliminate mosquito sources on your property.

WHY IT MATTERS TO YOUR BUSINESS

Reduce Mosquitoes Around Property

Promote Community Health

Positive Customer & Staff Experience

How Your Business Can Help

- ◆ Partner with the district to share educational resources at your business.
- ◆ Use simple tools like door fans or air curtains to keep mosquitoes out.
- ◆ Add a simple standing water inspection to daily operations.
